Meeting Date: October 15, 2019

Staff: Sarah Allen, Senior Planner

Subject: Planning Application Submittal Requirements

Summary
During a recent meeting the Design Review Commission requested the planning application submittal requirements to be placed on a future agenda in order for the Commission to review the requirements to discuss what is currently required and any potential modifications.

The submittal requirements vary slightly by application. Design Review, Hillside Development, Variance, Subdivision, Land Use Permit, etc. all have slightly different submittal checklists; however, the Hillside Development Permit requirements are likely to be the most robust and the ones applicable to the types of projects this Commission reviews on a regular basis. All of the application packets are available on the Lafayette website at:

www.lovelafayette.org > City Hall > City Departments > Planning & Building > Application Forms

Alternatively, the forms may be reached using this URL https://www.lovelafayette.org/city-hall/city-departments/planning-building/application-forms/download-forms

The requirements are meant to be comprehensive in order to have one set of guidelines for all types of projects. The amount and type of submittal materials required for a specific application are determined by the Project Planner based on the scope of the project and the level of review required.

Recommendation
Discuss and direct staff.

1. Application form for Hillside Development Permit including Submittal Requirements
HILLSIDE DEVELOPMENT PERMIT
INSTRUCTIONS

GENERAL

A Hillside Development Permit (HDP) is required for development in the Hillside Overlay District (HOD). The Hillside Overlay District is intended to protect the health, safety and welfare of the city by establishing regulations for the development of ridgeline, hillside and other rural residential areas within the city.

Activities and development subject to approval of a Hillside Development Permit include:

- Construction involving the erection, modification, or relocation of a structure
- Grading or other site work
- Removal of a native tree 4 or more inches in diameter as measured at 4’-6” above grade
- Removal of native riparian vegetation
- Change in density or intensity of land use
- Subdivision of land
- Lot line adjustment
- Phase II HDP (after obtaining approval for Phase I HDP – siting and massing determination)

A Hillside Development Permit is not required if:

- The construction does not require a building or grading permit
- The construction is entirely within the interior of an existing structure
- The construction is routine maintenance or replacement work that does not change the exterior appearance of the existing structure

PROCEDURES

Pre-application: Prior to application for a Hillside Development Permit, the applicants should discuss their plans with Planning Services Division staff to determine what regulations apply to their property. Once it is clear that an HDP is required for the proposed development, the applicant should carefully assess the impacts and public service demands of the project. Are there likely to be problems with utilities, street improvements or drainage easements or other foreseeable issues or controversies? The applicant should discuss any potential problems with the appropriate governmental agency or private consultants, as necessary, as well as with those neighboring property owners that may be affected by the proposed development. Please see the handout entitled “Marquis de Lafayette’s Tips for Success” for more suggestions and helpful tips.

Study Session: At the request of the applicant, the Design Review Commission (DRC) may conduct study sessions on the aesthetic aspects and possible issues related to a proposed project. These are held at the beginning of a Design Review Commission hearing. A study session allows an applicant to get feedback from the DRC early in the design process, before becoming overly invested in a given design. Ideally, a study session
would take place around the 30% design stage, after site constraints and advantages have been assessed, but without hard-line design drawings or finished presentation graphics. Please see the handout entitled “Study Session Information Sheet” for more information on how to request a study session.

Filing the Application: The applicant should carefully complete the application and be sure that all submittal requirements and fees are provided, and that the application is signed by the current property owner. A staff planner will check the application for completeness. Once staff has reviewed the plans (within 30 days), the applicant will be notified of any necessary alterations to the plans and additional submittals required. Once an application is deemed complete, the HDP application will be scheduled for a public hearing before the appropriate hearing authority.

Environmental Review: Staff will review the proposed application to determine what level of environmental review is necessary according to the California Environmental Quality Act. If a negative declaration or environmental impact report (EIR) is required, requests for additional information, fees and additional processing time are to be expected.

Hearing Authority: The Planning Commission (PC) is the hearing authority for (1) Phase I HDP, siting and massing determination for vacant hillside land, and (2) subdivision of land. The Zoning Administrator (ZA) will review all other Hillside Development Permit applications and, based on the scope of the proposed project, will determine if the hearing authority will be the Zoning Administrator and whether or not a public hearing will be required. The application will be referred to the Design Review Commission or Planning Commission, as determined by the Zoning Administrator, for more complex or larger scale projects. The Design Review Commission can also refer applications to the Planning Commission for their consideration. If applications are referred to the DRC or PC, additional application fees may be required.

If required, a notice of public hearing will be mailed at least ten calendar days before the hearing to all owners of property contiguous to the subject property and to the owners of other property, that in the opinion of the Planning and Building Services Manager, is directly affected by the proposed project. The applicant or a representative should be present at the hearing to make a presentation and answer questions. Any interested party may submit oral or written testimony. After close of testimony, the hearing authority may approve the HDP as submitted, approve it with amendments and additional conditions, or deny it. In considering an HDP, the hearing authority may impose conditions on the project to make the use more acceptable, to correct existing deficiencies, or to carry out the purpose and intent of Chapter 6-20 of the Hillside Development ordinance. The hearing authority may choose not to take action at the first hearing and continue the application to a future date.

Appeal of Decision: The applicant or any other aggrieved party may appeal in writing the action of the hearing body to the next level of hearing authority within fourteen (14) calendar days following action. If the action is not appealed, the action is effective on the fifteenth day. The fee for an appeal may be 50 to 100 percent of the application fee depending on the original fee. The same notification provided for the original hearing will be repeated. The applicant should be present and any interested person(s) may submit testimony. After close of testimony, the hearing authority for the appeal will make a decision on the proposed permit, or if necessary, continue the matter to a date certain for future action.
PROCESSING TIME

The total time for processing an HDP varies depending on the complexity and magnitude of the project. After an application has been deemed complete, it usually takes five to six weeks for the first meeting before the hearing authority. The requirement for a negative declaration or environmental impact report could add six to twelve months to the processing time, respectively.

TIME AND PLACE OF MEETINGS

**NOTE:** Starting January 2010, Design Review Commission and Planning Commission hearings will occur on MONDAYS. Zoning Administrator hearings will continue to occur on Thursdays.

- **Zoning Administrator hearings:** *first* and *third* Thursdays of each month, commencing at 2:00 p.m. at the City Offices, 3675 Mt. Diablo Boulevard, Suite 210.

- **Design Review Commission hearings:** *second* and *fourth* Mondays of each month, commencing at 7:00 p.m. at the new Lafayette Library and Learning Center, 3491 Mt. Diablo Boulevard in the Arts and Science Discovery Center.

- **Planning Commission hearings:** *first* and *third* Mondays of each month, commencing at 7:00 p.m. at the new Lafayette Library and Learning Center, 3491 Mt. Diablo Boulevard in the Community Hall.

A calendar of adopted meeting dates is available at [www.lovelafayette.org](http://www.lovelafayette.org).

PERMIT EXPIRATION

A Hillside Development Permit approval automatically expires if the use or action authorized is not started or construction incident thereto is not begun on or before the time limit specified in the permit, and thereafter diligently pursued. If no time is specified, the permit expires 12 months after the date of approval. The Planning and Building Services Manager may grant one 12-month extension of time upon written request prior to the expiration date of the permit if the City has not made relevant changes to the Lafayette Municipal Code and the development is not changed.
This Page Intentionally Left Blank
HILLSIDE DEVELOPMENT PERMIT
SUBMITTAL REQUIREMENTS

This checklist is intended to cover all types of development, large and small. Not all items may be applicable for the scope of your development, in which case check the N/A box. Please check all items and indicate the sheet number(s) where prompted. An applicant may obtain preliminary review from a planner during Planning Counter Hours. The Planning & Building Department will ultimately determine the level of detail needed to process your application once it has been submitted and is being processed. Hyperlinks are provided for the applicable handouts referenced in this document; however are also available on the City’s website, www.lovelafayette.org, or at the City offices.

GENERAL SUBMITTAL REQUIREMENTS

YES N/A

1. APPLICATION FORMS
   a. Standard application form.
   b. Response to findings.
   c. Brief description of the scope of work.
   d. Checklist completed and signed by the preparer with each box checked acknowledging submittal of the required item(s) and listing the corresponding sheet number(s).
   e. Agreement to Pay for City Services, completed and signed.
   f. Processing fee(s): credit card (Visa/MasterCard) or check (payable to City of Lafayette)

2. PRELIMINARY TITLE REPORT
   One (1) copy of report
   a. Not more than (6) six months old
   b. Listing all recorded easements and restrictions
   c. Providing legal description of the property

3. PRELIMINARY SOILS REPORT prepared by a registered geotechnical engineer
   One (1) copy of report with colored attachments and/or exhibits
   One (1) electronic (pdf) on a cd or by email

4. ARBORIST REPORT prepared by a certified or consulting arborist
   One (1) copy of report (which may include colored attachments and/or exhibits), including:
   a. Tree location, genus, species, diameter, dripline, and elevation at trunk base.
   b. Health and condition of the tree, including existing hazards to the tree.
   c. Potential impact of development on the tree or existing tree condition.
   d. Evaluation of preservation potential based on the tree’s existing condition and in relation to any potential development.
   e. Recommendations for protection, preservation, and requirements to maintain and improve tree health and assure survival.
   f. Tree inventory table listing the tree number (as numerically tagged in the field),

1 Monday through Friday between 12 p.m. and 5 p.m.; no appointment necessary

2 Required if the proposal entails development within the dripline of an existing protected tree ≥ 4” in diameter
species, trunk diameter, health of tree, potential impact of proposal, and indicate whether tree is to be saved or removed.

g. Site plan showing: numbered trees, accurate driplines, and proposed location of tree protection fencing.

h. Photos as applicable.

i. Post construction recommendations as applicable.

5. COLORS AND MATERIALS BOARD

8.5” x 11” board size and 3/4” maximum thickness with a colored elevation of the proposal and referencing the color chips and manufacturers’ specifications of the following:

a. Body/Siding
b. Trim
c. Windows
d. Roof
e. Exterior light fixtures, residential and landscaping
f. Fences
g. Walls and retaining walls
h. Hardscape

6. PHOTO AND VISUAL ANALYSIS

a. Site and neighborhood photos affixed to 8.5” x 11” heavy weight color print paper.

b. Field markers identifying the following:
   i. Green ribbon tied around all trees to be maintained.
   ii. Red ribbon tied around all trees proposed to be removed.
   iii. Yellow ribbon outlining all property lines.
   iv. Yellow ribbon outlining proposed addition(s).

c. Story pole or ground staking*
   i. Submit a story pole or ground staking plan (certified by a California Licensed Surveyor or a California Licensed Civil Engineer, showing its layout, height and location), no later than 14 days before the scheduled hearing date or the matter will be postponed.
   ii. Submit photographs of the story poles from most prominent public vantage points and surrounding residences.

d. Photo montage*
   i. Outline the project or graphically set it into the photos.
   ii. Submit photos from most prominent public vantage points and existing surrounding residences.

7. ENVIRONMENTAL INFORMATION FORM *

Based on an Initial Study, your project may be subject to additional environmental review fees, set by the State and due at the time of project approval. Refer to the Planning Fee Schedule for current fees.

---

3 Colors and materials board exceeding this thickness will be rejected.
4 Loose photos will be rejected.
5 See separate handout entitled “Ground Staking & Story Poles”
8. BIOTIC RESOURCES ANALYSIS *

One (1) copy of report, including:
   a. Type and location of threatened and endangered plant and animal species.
   b. Riparian vegetation on and within 100’ of subject property.
   c. Oak woodland and other plant communities providing habitat.
   d. Location of watercourses, springs, drainage swales, wetlands, wildlife corridors, and other natural features that may provide habitat or be subject to DFW 6 or ACE 7 jurisdiction.
   e. Area and location of undeveloped land on the subject property required to protect and enhance the continued viability of significant biotic resources, where applicable.
   f. Mitigation measures for impacts on significant biotic resources.

PLAN SET SUBMITTAL REQUIREMENTS 8

9. NUMBER OF PLAN SETS

Initial submittal for 30-day completeness review 9:
   One (1) reduced-size (11” x 17”)
   One (1) electronic (pdf) on a cd or by email

10. LAYOUT

All sheets shall be the same size, oriented in the same direction, and include the following:
   a. North arrow
   b. Scale
   c. Graphic (bar) scale
   d. Date of preparation
   e. Revision date(s)
   f. Changes or modifications clearly identified
   g. Title block including:
      i. Site address
      ii. Assessor’s parcel number (APN) or name of subdivision and lot number

11. COVER SHEET with the following:
   a. Sheet index
   b. Contact information for the following:
      iii. Owner
      iv. Architect/Landscape Architect
      v. Arborist
      vi. Engineer

---

6  Department of Fish and Wildlife
7  Army Core of Engineers
8  Example Submittals are available online.
9  Larger size plan sets may be requested by your project planner during the completeness review.
12. MAPS

a. Vicinity map (minimum 1" = 600’) showing the approximate location of the subject property within the vicinity of Lafayette.

b. Context map (minimum 1" = 50’) showing the location of the subject property within the context of the neighborhood.  
   i. Show and label the following:
      1. All parcels immediately adjacent to and around the site
      2. Approximate distance of the proposed addition (upper & lower story) to structures on adjacent lots
      3. Footprints of all structures
      4. Vacant parcels or open space
      5. Property ownership
      6. Property address
      7. Finished floor elevations
      8. Number of stories
      9. Approximate square footage
      10. Significant landscaping
      11. Significant topographic or man-made landforms and features

13. SURVEY – wet stamped and signed  

a. All property lines

b. Building footprint of all structures with dimensions to property line

c. Easements, fully dimensioned, as reflected on a current title report including:
   i. All public and private roads (labeled accordingly)
   ii. Rights-of-way
   iii. Easements, within and to the parcel

d. Street improvements - (curb, gutter, sidewalk, edge of paving)

e. Topography – (2’ contour intervals in area to be developed)

f. Drainage features including:
   i. Swales
   ii. Creeks (with required creek setbacks shown in both plan and sectional view)
   iii. Wetlands
   iv. Riparian habitat

g. Trees - show all trees ≥ 4” in diameter at 4.5’ above grade within 100’ of proposed development, with the following labeled:
   i. Tree species
   ii. Diameter of trunk
   iii. Elevation at trunk base
   iv. Field surveyed accurate driplines (generic symbols are not accepted)
   v. Tree identification number, provided by the arborist
   vi. Trees proposed to be removed with a prominent “X”

---

10 An aerial can be used to create the context map; however, it does not replace the context map.
11 Show buildings outlined in black, background in white, and vegetation/trees in gray.
12 Required if proposal encroaches within 5’ of required setbacks, or if the property is within a ridgeline setback
13 See separate handout entitled “Creek Setback Determination Guide"
14. SITE PLAN – based on the aforementioned survey

a. Property and zoning information, including:
   i. Property lines, dimensioned.
   ii. Setbacks (front, side, and rear), dashed.
   iii. Sewage disposal and public utilities.
   iv. Recorded easements (utility, drainage, access, etc.), labeled.
   v. Total and net 14 parcel square footage.

b. Building site(s) and footprint(s)
   i. Existing and proposed structures with dimensions to property lines.
   ii. Changes or additions to existing structures shown as hatched, shaded or otherwise highlighted.

c. Parking and circulation
   i. Location, dimensions, and quantity of existing and proposed covered and uncovered parking facilities. 15
   ii. Circulation plans for each vehicular and pedestrian way.
   iii. Fire District turnarounds (such as the shunt, t-turn, or circle), road width, slope, and vertical clearance shall be overlaid or highlighted on the circulation plans.

d. Impervious surface, existing and proposed
   i. Include a table calculating the square footage, including building footprint, driveway, patios, walkways, pools, etc.
   ii. Shade or hatch changes and additions

e. Structures - existing and proposed fences and retaining walls
   i. Label top-of-wall (TW) and bottom of wall (BW) spot elevations
   ii. Shade or hatch changes and additions

f. Existing trees - show all trees ≥ 4" in diameter at 4.5’ above grade within 100’ of proposed development and label:
   i. Tree species
   ii. Diameter of trunk
   iii. Elevation at base of trunk
   iv. Field surveyed accurate driplines (generic symbols are not accepted)
   v. Tree identification number, provided by the arborist
   vi. Trees proposed to be removed with a prominent "X"

g. Trails - general location of each hiking, riding and bicycle trail and recreational facility

h. Open space that will remain upon completion of development
   i. Designate a development boundary line that limits the area of development

i. Ridgelines
   i. Class I, Class II, or Class III ridgelines located within the project boundaries or within 100’ beyond the project boundaries
   ii. Setback areas (measured in plan view from the centerline of the ridge)
      1. Class I ridgeline setback is 400’
      2. Class II ridgeline setback is 250’

---

14 Excludes the area within vehicular rights-of-way and vehicular easements
15 Parking space minimum dimensions are 10’ by 20’ per space
15. SITE-SECTIONS

a. For all Hillside Applications:
   i. Provide cross-section(s) across the full extent of the property

b. For Class I and Class II ridges:
   i. Provide an adequate number of cross-sections through the project site to show ridgeline declination.
      1. No portion of a structure may be erected adjacent to a Class I or Class II ridge that is higher than a plane sloping downward at a declination of 15° from the horizontal intercept of the ridge.
      2. The measurement shall be made at the nearest point of the development to the ridgeline and measured perpendicular to the ridgeline or as a radius from the endpoint of the ridgeline.
      3. The declination line terminates at the boundary line of the hillside overlay district.

c. For Class III ridges:
   i. Provide an adequate number of cross-sections through the project site to show horizontal planes intercepting the ridge.
      1. No portion of a structure may be erected higher than the horizontal plane.
      2. The horizontal plane shall be at the nearest point of the development to the ridgeline and perpendicular to the ridgeline or have an arc of 90° from the endpoint of the ridgeline.

16. FLOOR PLANS

a. Scale – drawn at the largest architectural scale that can fill the sheet (1/8” = 1’ or larger)

b. Gross floor area – Table calculating existing and proposed
   i. Include all existing and proposed structures having three walls and a roof, such as attached/detached accessory structures, garages, carports, basements, second stories, and area capable of being developed as habitable space.

c. Rooms - label all existing and proposed rooms for each floor level including:
   i. All usable or potentially usable areas or spaces (including basements, attics, crawl spaces with significant headroom, lofts, accessory buildings, etc.)
   ii. All decks, balconies, porches, garages/carports, etc.
   iii. Exterior and interior building dimensions.
   iv. Existing and proposed square footage of all usable or potentially usable areas.
   v. Doors, windows, bay windows, chimneys, stairways, other architectural features.

d. Demolitions, changes, and additions shown as dashed, highlighted, or otherwise called out

e. Existing and proposed floor plans shown with (2) two separate plan view drawings, done at the same scale and shown on the same sheet.
   i. For example, on one sheet, side-by-side or one-above-the-other, show existing and proposed conditions for the same floor plan, labeled accordingly “existing lower floor” “proposed lower floor”

f. Lighting (exterior residential):

---

16 Total horizontal area in sq. ft. of each floor level within the exterior walls of all buildings on a parcel, as measured at the exterior face of the enclosing walls
i. List and label existing and proposed lighting
ii. Provide a legend and indicate quantity of each lighting type

17. ELEVATIONS
   a. Scale – drawn at the largest architectural scale that can fill a sheet (1/8" = 1’ or larger)
   b. Dimensions
   c. Building height as defined by the Lafayette Municipal Code Section 6-313
   d. Finished grade indicating existing and proposed
   e. Demolitions, changes, and additions shown as dashed, highlighted, or otherwise called out
   f. Existing elevations with dashed lines over proposed elevations
   g. Existing and proposed elevations shown with two separate plan view drawings, done at the same scale and shown on the same sheet.
      i. For example, on one sheet, side-by-side or one-above-the-other, show existing and proposed conditions for the same elevation, labeled accordingly “existing west elevation”, “proposed west elevation”
   h. Indicate roof, doors, windows, trim, down spouts, and all other architectural features
      i. Call out manufacturers’ specifications for exterior walls, trim, and roofing materials.
   i. Retaining wall and fence elevations/profiles indicating heights, colors, and materials
   j. Perspective, colored elevations to indicate shadow and visual relief. Renderings shall include site development, accurate topography, and vegetation.*

18. BUILDING SECTIONS
   a. Scale – drawn at the largest architectural scale that can fill a sheet (1/8"=1’ or larger)
   b. Coincident with critical roof ridges or site conditions
   c. Locate where cross sections are taken on the site plan and/or floor plans
   d. Indicate foundation, finished floor, and roof ridge elevations (above established datum)

19. GRADING AND DRAINAGE PLANS *
   a. Contours, existing and proposed
      i. 2’ contour intervals in the area to be developed
      ii. Extend contours a minimum of 50’ beyond property lines
   b. Calculate the amount of cut, fill, import or export in cubic yards
   c. Drainage facilities - existing and proposed drainage facilities within and adjacent to the site, including but not limited to:
      i. Swales
      ii. Creeks
      iii. Drainage ditches
      iv. Discharge facilities
      v. Catch basins
      vi. Subsurface drainage pipes (closed and open)
   d. Sanitary sewers and storm drain facilities, existing and proposed
   e. Incorporate appropriate pollutant source control and design measures, to treat runoff
   f. Existing trees - show all trees ≥ 4” in diameter at 4.5’ above grade within 100’ of proposed

---

17 See separate handout entitled “Building Height”
18 Required if project involves ≥ 500 sq. ft. of new or replacement impervious surface or ≥ 50 cubic yards of grading.
19 See separate handout entitled “Drainage Plan Guidelines”
20 See separate handout entitled “Stormwater Quality Control Guidelines”
development and label:
  i. Tree species
  ii. Diameter of trunk
  iii. Elevation at trunk base
  iv. Field surveyed accurate driplines (generic symbols are not accepted)
  v. Tree identification number, provided by the arborist
  vi. Trees proposed to be removed with a prominent "X"

g. Open space - areas of natural open space that will remain upon completion of development
  i. Designate a development boundary line that limits the area of development

h. Roof plan – elevation of each roof ridge above established datum shall be noted.
  i. Changes or additions to existing structures shall be hatched, shaded, or otherwise highlighted.

i. Prepare a Stormwater Control Plan \(^{21}\) if:
  i. Your project creates \(\geq 10,000\) sq. ft. of impervious surface; OR
  ii. Your project results in addition or replacement, which combined, total \(\geq 10,000\) sq. ft. of impervious surface.

\(\square\) \(\square\) 20. LANDSCAPE AND IRRIGATION PLANS  

<table>
<thead>
<tr>
<th>Sheet Number(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>__________</td>
</tr>
</tbody>
</table>

a. Topography - show existing topography with a light line weight and proposed topography with a darker or heavier line weight

b. Existing trees - show all trees \(\geq 4''\) in diameter at 4.5’ above grade within 100’ of proposed development and label:
  i. Tree species
  ii. Diameter of trunk
  iii. Elevation at trunk base
  iv. Field surveyed accurate driplines (generic symbols are not accepted)
  v. Tree identification number, provided by the arborist
  vi. Trees proposed to be removed with a prominent "X"

c. Plant list table – list proposed planting as follows:
  i. Trees – species (common and botanical name), quantity, size to be planted, and whether species is native.
  ii. Shrubs - species, quantity, size to be planted, and whether species is native.
  iii. Groundcover - species, size and spacing, and whether species is native.
  iv. All other plants may be shown and referred to in general terms.
  v. Only list those plants shown in the plan.

d. Irrigation - submit a preliminary plan showing:
  i. Watering zones (drip/spray) with corresponding legend and table
  ii. No spray irrigation or lawn shall be within 15’ of oak trees (existing or proposed)

e. Lighting (landscape):
  i. List and label existing and proposed lighting.
  ii. Provide a legend and indicate quantity of each lighting type.

\(^{21}\) See separate handout entitled “Stormwater Control Plan Submittal Requirements”
PLEASE NOTE: There may be additional requirements after initial review by the city landscape consultant, city staff or the hearing authority.

Rev. 2013.07.19
BEYOND THE REQUIREMENTS – SUGGESTIONS FOR SUCCESS!

PRESENTATION
Presentation can greatly affect the success of your project. Clear and concise plans can be processed faster and more effectively. The City provides examples online and at the City Offices of clear and concise submittals to emulate. Below are some tips on how your plans can read better!

Light Line Weights:
- Existing topography
- Existing trees (X for trees to be removed)
- Existing structures (to be maintained)

Shaded, Hatched
- Proposed additions
- Proposed impervious surface
- Proposed native trees and plants

Dashed Lines:
- Existing topography
- Existing structures (to be removed)
- Existing elevations (superimposed over proposed)

Dark/Heavy Line Weights:
- Proposed topography
- Proposed trees

DESIGN
Development should be sensitively designed to work with the site’s constraints and natural features, and to reduce its impacts (visually and physically) to the site, the neighborhood, and the public at large. A successful project substantially complies with the Residential Design Review Guidelines and follows the city’s Tips for Success. Here are some additional tips!

Colors and materials:
- Dark, natural, and mixed colors and materials decrease visibility and reduce the apparent massing of a residence or structure. These are encouraged.
- Light, bright, or high contrasting trim and windows increase visibility. These are discouraged.

Landscape/Hardscape:
- Grading and landscaping should appear natural and semi-rural, especially as it reaches property lines, open space, or public views.
- New or replacement vegetation in areas within or abutting open space and natural areas should be native to the surrounding area. The goal of the planting should be a seamless blending with the natural vegetation.
- Small gardens, ornamental plantings, and lawn areas should be clustered near the home and not visible from public places listed in the viewing evaluation map.
- Terracing or padding of the lot should be avoided and is discouraged.
- Off-haul excess soil rather than balance onsite to maintain natural grades.
- Walls and retaining walls should be kept at a minimum. Where needed, they should be naturally designed, low in height, and organically configured with dark colors/materials and landscape mitigation.
- Pervious surfaces should be used in lieu of impervious surfaces for hardscape.
- Native, drought tolerant, deer resistant plantings are encouraged.

Lights:
- To reduce a project’s offsite visibility at night and to reduce impacts to neighbors, exterior light fixtures (residential and landscaping) should be shielded, low wattage, and directed downward.
- Shielded means the light source (bulb) is not visible. Opaque, seeded, or colored glass does not meet this requirement.
- Consider using recessed can lights were feasible and reducing the overall quantity of fixtures.

## OWNER / AGENT STATEMENT

Property Owner Consent – I am the legal owner of record of the land specified in this application or am authorized and empowered to act as an agent on behalf of the owner of record on all matters relating to this application. I declare that the foregoing is true and correct and accept that false or inaccurate owner authorization may invalidate or delay action on this application. I hereby grant permission to access the property to individuals involved in the processing of the subject application(s). I agree to defend, indemnify and hold harmless the City, its agents, officers, officials, and employees from all claims, demands, lawsuits, writs of mandamus, and other actions or proceedings (collectively “Actions”) brought against the City or its departments, commissions, agents, officers, officials, or employees to challenge, attack seek to modify, set aside, void or annul any City decision made in connection with this application. In the event the City becomes aware of any such Actions, the City shall promptly notify me and shall cooperate fully in the defense. It is expressly agreed that the City shall have the right to approve, which approval shall not be unreasonably withheld, the legal counsel providing the City’s defense, and I shall reimburse City for any attorney’s fees, costs and expenses, including any plaintiff’s or other third party’s attorneys’ fees, costs and expenses, directly and necessarily incurred by the City in the course of the defense.

HILLSIDE DEVELOPMENT PERMIT / RESTRICTED RIDGELINE EXCEPTION

REQUIRED FINDINGS PER SECTIONS 6-2028, 6-2067, AND 6-2071

REQUEST(S):  
☐ Hillside Development Permit
☐ Class I Ridgeline Setback Exception (development within 400-feet of ridge)
☐ Class II Ridgeline Setback Exception (development within 250 feet of ridge)
☐ Exception to Exceed Height Limitation Based on Horizontal Plane of Class III Ridge

In granting approval for this exception, a number of findings must be made. Please respond to each of the following statements on a separate sheet.

A. Explain how the development is consistent with the applicable goals and policies of the General Plan and is in conformance with applicable zoning regulations.

B. Explain how the development will preserve open space and physical features, including rock outcroppings and other prominent geological features, streams, streambeds, ponds, drainage swales, native vegetation, native riparian vegetation, animal habitats and other natural features.

C. Explain how structures in the Hillside Overlay District will, to the extent feasible, be located away from prominent locations such as ridgelines, hilltops, knolls and open slopes;

D. Explain how the development, including site design and the location and massing of all structures and improvements will, to the extent feasible:

   1. Minimize the loss of privacy to surrounding residents and not unduly impact, restrict or block significant views;

   2. Not have a significant visual impact when viewed from lower elevations from public places, using the viewing evaluation map as a guide to establish locations from which views are considered; and

   3. Not interfere with a ridgeline trail corridor or compromise the open space or scenic character of the corridor.
E. Within 100 feet of a restricted ridgeline area, or when a exception to a ridgeline setback has been granted, explain how the development will result in each structure being substantially concealed by terrain or vegetation when viewed from lower elevations from public places, using the Viewing Evaluation Map as a guide to establish locations from which views are considered.

F. Explain how development grading will be minimized to limit scarring and cutting of hillsides especially for long roads or driveways, preserve existing geologic features, topographic conditions and existing vegetation, reduce short and long-term erosion, slides and flooding, and abate visual impacts.

G. Explain how the development provides adequate emergency vehicle access, including turn-around space, to the building site and surrounding on-site undeveloped or isolated areas.

H. Explain how each structure and proposed landscaping complies with the City’s Residential Design Guidelines.

I. Explain how the new or replacement vegetation for the development is native to the surrounding area in areas abutting open space and natural areas, such as oak woodland, chaparral, grassland and riparian areas, and conforms to the following policies, pursuant to Section 6-2051:

   New or replacement vegetation in an area abutting open space and natural areas, such as oak woodland, chaparral, grassland and riparian areas, excluding planting for erosion control or land stabilization, shall be native to the surrounding area. The goal of the planting should be a seamless blending with the natural vegetation. The reviewing authority may grant an exception to this requirement for a small garden area near the home provided it is not visible from public places and contains no non-native trees or shrubs over six feet in height, or large green expanses.

J. Explain how the development will not create a nuisance, hazard or enforcement problem within the neighborhood or the city, nor require the city to provide an unusual or disproportionate level of public services.
REQUEST FOR DEVELOPMENT WITHIN THE 15-DEGREE DECLINATION OF A CLASS I OR CLASS II RIDGELINE SETBACK

REQUIRED FINDINGS PER SECTION 6-2029 AND 6-2070

APPLICANT: _______________________________ PHONE NO. __________________

PROPERTY ADDRESS: ______________________________ PARCEL NO. ______________

Section 6-2070 states that the Planning Commission may grant an exception to the restriction of development within the 15 degree declination line of a class I or class II ridge if it makes the findings in A or B or C below:

In granting approval for this exception, a number of findings must be made. Please respond to each of the following statements on a separate sheet.

A. The topography or existing vegetation are such that:
   1. The building will not have a substantial visual impact and will not silhouette above the ridge when viewed from lower elevations in the city, using the Viewing Evaluation Map as a guide for areas from which views are considered; and
   2. Grant of exception will not interfere with an existing or proposed ridge trail or compromise its open space and scenic character.

B. For existing lots of record where it is not possible to substantially conceal the building in conformance to section (A) above, the Planning Commission may grant an exception if it finds that:
   1. The height, size, siting, design and landscaping are such that the building is concealed to the maximum extent feasible and the structure will not silhouette above the ridge when viewed from lower elevations in the city, using the Viewing Evaluation Map as a guide for areas from which views are considered; and
   2. Grant of an exception will not interfere with an existing or proposed ridge trail or compromise its open space and scenic character.

C. For subdivision, when the prohibition would deprive the property of all economically viable use and the subdivision meets the standards in section 6-2071 to the maximum extent feasible. In granting an exception under this subsection the density:
   1. Shall not exceed the density permitted by the slope density formula or the underlying zoning district, whichever is less; and
   2. Shall not exceed that necessary to avoid an unconstitutional taking of the property.

HILLSIDE DEVELOPMENT PERMIT NO. __________________
AGREEMENT TO PAY FOR CITY SERVICES

In consideration for the City providing the services described in this Agreement, the undersigned agrees as follows:

1. The City services requested relate to development application number ________________, property in the City of Lafayette located at ___________________________________, assessor’s parcel number __________________.

2. This Agreement is for services and fees that are in addition to the planning fees paid upon the filing of the referenced development application. I agree to pay for the additional charges imposed by the City for staff time spent processing the application based upon an hourly rate established by resolution of the City Council. These services include but are not limited to City staff time spent for engineering and other City administrative services regarding the application. In addition, I agree to pay for services of consultants retained by the City and required by it in connection with the development application at the hourly rate charged by each consultant to the City. These services include but are not limited to legal, landscaping, traffic engineering and environmental services.

3. The City will bill for the services performed under this Agreement upon a monthly or other periodic basis. If at any time the balance due exceeds $500.00, the City may cease processing the application, prepare a recommendation for taking action on the application and present the application to the appropriate hearing body for final action.

4. The development application account will remain open until it is paid in full. Final payment in full is due as follows:
   a. In the case of a subdivision, upon release of the final improvement bond or when conditions of approval are satisfied, which ever is later in time;
   b. In the case of all other applications, when the City authorizes Contra Costa County to issue final building inspection clearance or when work for which a permit is issued is completed;
   c. If an application is denied, upon expiration of the appeal period or upon a final decision on appeal;
   d. If an application is withdrawn, when all remaining staff work on the application is completed;
   e. Upon the expiration of 12 consecutive months during which there was no activity on the application.

5. The undersigned is responsible for the payment of the costs and charges involved with the application even though the property or project is sold or assigned to another party. If the undersigned desires to transfer payment responsibility to another, it is the undersigned’s responsibility to have this Agreement replaced by a new agreement with the responsible party. Any outstanding balance must be paid before the City will accept a replacement agreement.

6. The undersigned agrees to advise the City in writing of any change to their billing address and represents that (s)he is the party responsible for payment of the costs or any other obligations incurred under this Agreement.

7. The undersigned agrees to defend, indemnify and hold harmless the City, its agents, officers, officials, and employees from all claims, demands, lawsuits, writs of mandamus, and other actions or proceedings (collectively “Actions”) brought against the City or its departments, commissions, agents, officers, officials, or employees to challenge, attack seek to modify, set aside, void or annul any City decision made in connection with this application or Agreement. In the event the City becomes aware of any such Actions, the City shall promptly notify the undersigned and shall cooperate fully in the defense. It is expressly agreed that the City shall have the right to approve, which approval shall not be unreasonably withheld, the legal counsel providing the City’s defense, and the undersigned shall reimburse City for any attorney’s fees, costs and expenses, including any plaintiff’s or other third party’s attorneys’ fees, costs and expenses, directly and necessarily incurred by the City in the course of the defense.
